

# REBAK ISLAND

## RESORT & MARINA, LANGKAWI

## NATURE WALK

Take a stroll through island's diverse landscape, marvelling at the habitat's diversified range of plants and animals.

Naturalist Selva will lead you on a 1-mile (1.6-kilometer) nature trail through this million-year-old rainforest, showing you how the area's ecosystem works.

You'll learn about each species' unique adaptations to its environment, how it interacts with other species, and how its presence benefits or hinders the growth of other plants or animals in the area.

*IMPORTANT NOTES : For your comfort and safety during our evening nature walks, we strongly recommend wearing covered shoes and dressing in appropriate casual attire. This will help protect you from insects and ensure a more enjoyable experience as you explore the natural beauty of our trails.*
